Profile

I am a senior iOS app developer. I have 8 years iOS app development experience including over 6 years commercial application developing experience. I earned two master's degrees in engineering study and ICT respectively. I have over 6 years security system industry working experience and two years start-up company working experience. Now, I am working in Optus as a senior iOS developer.

Key Strengths

- Strong iOS Swift coding skill
- Strong Git operating skill
- Have agile tribe working experience
- Curiosity in emerging technologies
- Learning Agility
- Strong Working Ethic
- Strong Communication Skills

Skills

- Proficient in using **Swift, Objective-C** to develop commercial mobile apps.
 - Proficient in **MVVM** design pattern with or without **RxSwift**.
 - Trained by McKenzie to running an **Agile Squad** in **Tribe**.
 - Proficient in **Accessibility, PushNotification, CoreLocation, MapKit, iBeacons, ARKit, SceneKit**.
 - Proficient in **DJI SDK, Alamofire, Facebook SDK, Google Serial SDKs, Ably SDK**
 - Proficient in **Git, TDD** in **Vim** and **Xcode** working environment.
 - Intermediate in information security, major in **mobile app security assessment**.
 - Proficient in using **Xcode Instruments** to tuning time performance and memory leaking development
- Other ICT skills:**

- Proficient in **Go** and **PHP** in commercial mobile app with **RESTful** backend service
- Used **Java**, **C**, **Delphi** and **LabView** in industrial software development.
- Used CA-Clipper and dBase in a legacy (**30+ years old language**) database system.

Career Experience

Apr 2018 - Now Senior iOS Developer, Optus, Sydney

Key Tech: iOS, Swift 4, Git, CI/CD

[Optus](#) is the second largest telecommunications company in Australia. I am working in the new funded tribe of Digital Hub for MyOptus mobile app project. The MyOptus app is the primary app for Optus customer to checking account balance, data usage and even more comprehensive features.

Duties and Responsibilities:

- Develop new features for MyOptus App (MOA)
- Develop and update accessibility feature
- Maintain business as usual(BAU) tasks
- Working with our squad members in the tribe to take ownership of project
- Review other iOS developers' Pull Request
- Setup and maintain CI/CD server for tribe

Aug 2017 - Mar 2018 iOS Team Leader, Thred, Sydney

Key Tech: Swift 4, ARKit, SceneKit, Git

[Thred](#) is an ASX listed startup company. It is an innovative technology company specialising in augmented reality and location-based technologies. It created an instant messaging app Sweep, with AR and geolocation feature.

Duties and Responsibilities:

- Develop new features for Sweep
- Managing the iOS develop team
- Managing and organising app release in App Store

Feb 2017 - Now Full Stack Developer, Siphty Pty Ltd, Sydney

Key Tech: Swift 3, Golang, Git, DJI Mobile SDK

Siphty is a startup company fund by me with my friends. It hosts our innovation projects. The main products are ADS-B serial apps and computer graphic/computer vision projects. The HMD+ is a drone remote controller app provides low attitude aircraft collision avoiding and No-Fly Zones notice. The ADSB Radar is

an app with live virtual aircraft radar and Geographic AR view.

Duties and Responsibilities:

- Design and developing iOS apps
- Managing and organising App Store account
- Planning road maps for products strategy

May 2016 - Feb 2017 Mobile App Developer, MobileDEN Pty Ltd, Sydney

Key Tech: Swift 3, Objective-C, Java, Git

MobileDEN is a startup mobile app agent company. It has several well-known fast-food franchise customers, such as Starbucks, Red Rooster and Oporto.

Duties and Responsibilities:

- Developing iOS apps
- Maintaining previous iOS project

May 2010 - April 2016 Mobile App Developer, Digiflex Pty Ltd, Sydney

Key Tech: Objective-c, Swift, Java, Go, PHP, Git, dBase, Delphi, LabVIEW

Digiflex is a native Australian electronic security company which provides access control security solution, designs and produces a serial of control panels and modules for BOSCH Security Australia.

Duties and Responsibilities:

- Leading iOS app project team
- Assessing iOS app security
- Developing Android apps
- Developing back end app server

Other Duties:

- Maintaining PCB tester program on LabVIEW and National Instruments;
- Developed firmware programming application platform application by Delphi;
- Maintaining Inventory Database CA-Clipper code dBASE structure

2009 Help-desk Technician, Aegon-Cnooc Life Insurance Corporation, Shanghai

Key Tech: Enterprise resource planning (ERP), Active Directory, Windows Server, SQL Server

AEGON-CNOOC Life Insurance Corporation is funded by two Fortune 500 enterprises, AEGON and CNOOC.

Duties and Responsibilities:

- Provide level 2 helpdesk service daily
- Process routine for business continuing process in English working environment at headquarter.

Academic Experience
